GSM A22

GSM A22 is a state of the Art GSM remote control system full with innovative solutions for control and monitoring of Your cabin, Mobil home and more. Wireless control of 4 groups 220 VAC modules with a simple SMS-message. The Built in freeze guard will tell you when it is time for You to activate the built in thermostat. You will save a lot of expensive energy as the Heating system is only active when it is needed. The Battery back-up will keep the A22 up and running and will warn You with SMS for power fail. The Two inputs can be used for alarm or fire warning purposes. You Activate/Deactivate the Alarm function via SMS, no additional control panel is required. A22 is factory preprogrammed and is activated by an single SMS. All The Factory default can be altered by sending SMS to the A22.
